

RELEASE NOTES

Starlight — 16 August 2026

This release includes a new Forgejo icon, a fix for Zod union support in schema extensions, and corrected text direction for code examples in RTL languages when using Sätteri.

USER IMPACT

Added a Forgejo icon and resolved issues with Zod union schema extensions and RTL code example rendering in Sätteri.

Change period: 27 Jul 2026 — present

CHANGE

Schema Extension Fix

Fixed regression when extending docsSchema with Zod unions

WHAT THIS MEANS

Corrected an issue where extending the Starlight frontmatter schema with Zod unions caused the loss of default schema properties.

How to use it

If you are extending the `docsSchema` in your configuration using Zod, you can now safely use `z.union()` or discriminated unions without losing default schema properties.

ADDITIONAL CHANGES

Other changes

CHANGE

RTL Code Support Fix

Fixed code example text direction in RTL languages for Sätteri

WHAT THIS MEANS

Improved the rendering of code examples in Right-to-Left (RTL) languages when utilizing the Sätterer Markdown processor, ensuring correct text direction.

How to use it

This fix applies automatically to sites using the Sätterer Markdown processor in RTL languages.

CHANGE

New Forgejo Icon

Added built-in Forgejo icon

WHAT THIS MEANS

Added support for the Forgejo icon among the built-in icon set.

How to use it

You can now use the Forgejo icon in areas of the site that support built-in social or project icons.
